

KITCHEN LAYOUT

CONCEPTS PACKAGE

£500

NATALIE ROUKIN
INTERIORS

At Natalie Roukin Interiors we are passionate about interior design being accessible to all, so we've created a simple, affordable and easy to use *Kitchen Layout Concepts* service. The best part? It's all done online. Everything! No scheduling home consultations or deliberating for hours online, with just a few simple steps we can create a kitchen layout that you'll truly love.

If you are about to invest in your kitchen and want to be able to showcase it to look at its best, then an interior designer is someone who thinks creatively and spatially and looks at the bigger picture of an interior space that clients often cannot. Thinking outside of the box when it comes to spatial planning a kitchen is what we do!

Our bespoke layout concepts include floorplan layout ideas that optimise your space for best functionality and flow which are tailored specifically to you and how you live. The concepts will show you different ways your kitchen space could be laid out, where we organise your kitchen into its specific zones where key kitchen appliances and seating could be positioned, ultimately giving you the deciding factor as to which one suits you the best.

01 Starting the Design Process

Before we can start spatial planning, you will need to submit your kitchen layout brief. This will provide us with all the information we need about the space, your specific requirements, how you use your kitchen currently and what needs to change for it to work optimally for you now. We'll also ask you to provide some measurements and photos too, we'll send you a handy form with everything you need to submit to get the process started.

02 Virtual Consultation

After reading through your brief, Natalie & Jenna will get in touch to arrange a virtual consultation where we can chat through your answers and get the layout concepts process rolling.

03 Concepts

Once Natalie & Jenna have understood your brief, your kitchen floorplan layout is produced using the measurements and photos you have provided to create the Kitchen Layout Concepts for you.

04 Kitchen Layout Concepts Presentation

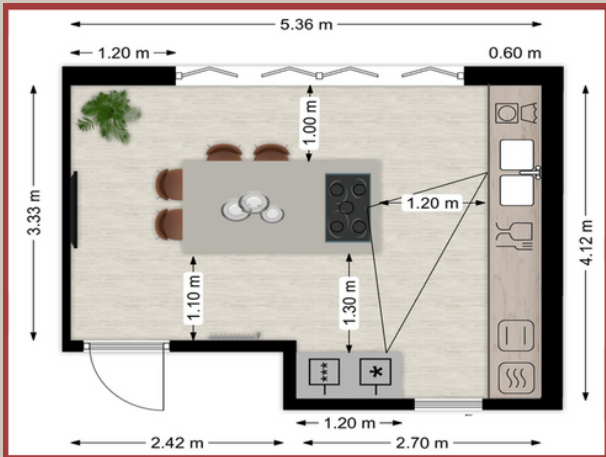

Once your concepts are complete, you will receive your kitchen layout concept boards showing you different ways your kitchen space could be laid out, organised into its specific zones with key kitchen appliances and seating options.

05 Final Virtual Consultation

After receiving your concepts you will receive a link to book your final virtual consultation with Natalie & Jenna to go through the concepts with you so that you understand the options you have been provided with and answer any questions you might have.

WHAT'S INCLUDED

WITH OUR KITCHEN LAYOUT CONCEPTS PACKAGE WE PROVIDE YOU WITH PROFESSIONALLY THOUGHT THROUGH OPTIMAL LAYOUTS ALLOWING YOU TO DECIDE WHICH ONE SUITS YOU BEST, TAKING THIS FORWARD IN TO THE DESIGN STAGE OF YOUR NEW DREAM KITCHEN.
